Anchor™ Highland Stone® Free Standing Wall

The Anchor Highland Stone® Free Standing Wall is crafted with the same earthen colors and rough-hewn texture that made the Anchor Highland Stone® a top choice for retaining walls. The stones are available in three different sizes giving wall appearance a more natural look. Straight or curved, the Anchor Highland Stone® Free Standing Wall is our most versatile landscape product yet.

COMPOSITION AND MANUFACTURE

Anchor Highland Stone® Free Standing Wall is made from a “no slump” concrete mix. Made under extreme pressure and high frequency vibrations, Anchor Highland Stone® has a compressive strength greater than 3500psi and a water absorption maximum of 7%.

INSTALLATION

Step 1 - Excavate down and create a leveling pad of compacted base material that extends a minimum 6” in front of and 6” behind the stone. This leveling pad should also be a minimum of 6” deep. Once the pad is level and compact, begin placing the stones. The base course must be buried below grade and is included when calculating total wall height.

Step 2 - To build the wall, use the trapezoidal-shaped stones. The long side should be placed in alternating directions (back and front) to form a straight wall. To turn a radius, stones can be placed facing the same direction or saw-cut if needed.

Step 3 - Stones can be placed in any order to form an aesthetically pleasing pattern. The simplest pattern is one that incorporates large, medium and small stones. Stones should be fitted tightly against one another.

Step 4 - After setting the first course, sweep it clean to remove any debris before setting the second course on top of it. Remember to keep the wall on bond by placing stones in a staggered relationship to the course beneath.

Step 5 - Repeat this process to complete the wall. When finishing, glue the top two courses and cap into place with a concrete bonding material. For added strength, use glue on all courses.

Column: Add a dignified look and increased stability to a wall. Columns are also a great way to incorporate lighting. Columns can be located in the middle or at the ends of a wall. The space left in the center of a column allow for reinforcement or electrical wiring if needed. To build columns, cut one column stone in half and stack column stones in a rotating pattern for each course. Two (2) column stone halves are needed for every four (4) courses.

Column Installation

Corner Installation

PRODUCT INFORMATION

Anchor Highland Stone® Free Standing Wall is available in a variety of sizes.

Maximum wall height: 2 ½ ft. Minimum radius: 4 ft.

18" Highland FSW

Nominal Dimensions:
Front: 18" L x 9" W x 6" H
Back: 16" L x 9" W x 6" H
Wt./Stone: 80 lbs.
Stones/Pallet: 40
Approx. Wt./Pallet: 3200 lbs.**
Face Ft./Pallet: 29
Product Number: 893

12" Highland FSW

Nominal Dimensions:
Front: 12" L x 9" W x 6" H
Back: 10" L x 9" W x 6" H
Wt./Stone: 50 lbs.
Stones/Pallet: 60
Approx. Wt./Pallet: 3000 lbs.**
Face Ft./Pallet: 28
Product Number: 892

6" Highland FSW

Nominal Dimensions:
Front: 6" L x 9" W x 6" H
Back: 4" L x 9" W x 6" H
Wt./Stone: 20 lbs.
Stones/Pallet: 100
Approx. Wt./Pallet: 2,000 lbs.**
Face Ft./Pallet: 21
Product Number: 891

Highland Column

Nominal Dimensions:
Front: 18" L x 9" W x 6" H
Back: 18" L x 9" W x 6" H
Wt./Stone: 75 lbs.
Stones/Pallet: 40
Approx. Wt./Pallet: 3000 lbs.**
Face Ft./Pallet: 30
Product Number: 894

Anchor Wall Cap #824**

Nominal Dimensions: 17 1/4" L x 10" W x 3" H*
Wt./Stone: 34 lbs.
Stones/Pallet: 90
Approx. Wt./Pallet: 3,060 lbs.
Linear Ft./Pallet: 130
Product Number: 824

* Fractional dimensions are nominal **Caps not available in all markets.
** Does NOT include 50 lbs. for wooden Pallet.

Note: Colors are shown as accurately as possible in brochures & samples, but due to the nature of the product, regional color differences and variables in print reproduction, colors may not match exactly.
